Switches

DIP, Push Button, Slide & Tactile Switches

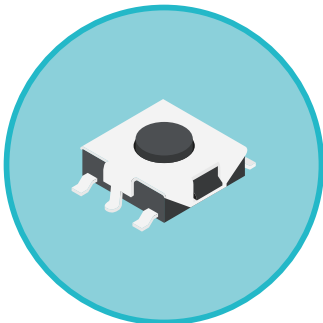

Activate your design with our line of DIP switches, push button switches, slide switches, and tactile switches. With an extensive library of resources, our switches feature multiple configurations, ultra-compact footprints, and IP-rated options to help engineers meet a variety of switching needs.

Featured Tech ○○○○○

Waterproof Switch Solutions

Designed to protect against moisture and other environmental contaminants, Same Sky offers several DIP switch, push buttons, and tactile switch models with Ingress Protection (IP) ratings of IP66 and IP67. With a variety of configurations, our waterproof switch products give engineers additional flexibility when designing for industrial, outdoor, or any application where environmental factors may be a concern.

Mini Switch Solutions

Aimed at addressing the continued miniaturization of electronic products, Same Sky carries a range of mini push button, slide, tactile, and DIP switch models. With ultra-compact footprints as small as 3.4 mm x 2.4 mm and profiles as low as 0.5 mm, these mini switches are ideal for a variety of space-constrained designs.

Engineering Tools

Resource Library

Gain access to a wide range of videos, blogs, ebooks, webinars, and more to assist in your next design.

CAD Model Library

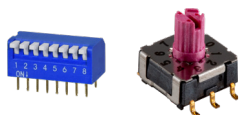

Save time and resources by utilizing our library of free, ready-made 3D models and PCB footprints to help you to streamline the design process.

Global Stock Availability

Our network of global distribution partners provides you with quick and easy access to hundreds of our switch products, ready to ship same day across the globe.

Switches Product Line

DIP Switches

1 to 16 Positions

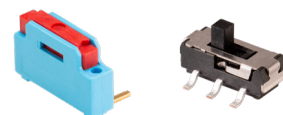

- Piano, rotary, and slide actuator types
- Pitches of 1.27, 2.54, or 5.08 mm
- SMT or through hole mounting styles
- Flat or raised actuator levels
- Variety of terminations
- IP67 rated models available

Push Button Switches

Anti-Vandal, Standard & Mini Types

- Momentary and maintained versions
- Package sizes as small as 9 x 6 mm
- Profiles as low as 5 mm
- SPST, SPST-NO, SPDT, DPDT circuits
- Off-(On), Off-On, or On-(On) switch functions
- SMT, panel mount, or through hole mounting styles
- Multiple termination types
- Variety of actuator types and colors
- IP rated and illuminated models available

Slide Switches

Packages down to 6.65 x 2.75 x 1.1 mm

- Pitches from 2 to 6.9 mm
- SPDT, SP3T, SP4T, DPDT, DP3T, and DP4T circuits
- Raised or flat actuator levels
- Variety of switch functions
- Gull wing or PC pin terminations
- SMT or through hole mounting styles
- Vertical or horizontal orientations

Tactile Switches

0.35 to 17 mm Actuator Heights

- Package sizes as small as 3.4 x 2.4 mm
- Operating forces from 100 up to 700 gf
- SPST circuits
- SMT or through hole mounting styles
- Variety of terminations
- -40 up to 90°C operating temperature ranges
- Lifecycle ratings up to 500,000 cycles
- IP rated and illuminated models available
