# SERIES: CBM-40B | DESCRIPTION: DC BLOWER

#### **FEATURES**

- · dual ball bearing
- 40 x 40 mm frame
- · multiple speed options
- · PWM/tachometer wires available

Notes:

- 1. At rated voltage, after 3 minutes.
- 2. At rated voltage, room temperature, 65% humidity, 0 inch H<sub>2</sub>O static pressure.
- 3. At rated voltage, O CFM airflow.
- 4. Measured in an anechoic chamber as per ISO3745/GB4214-84 at rated voltage, with background noise 20±2 dBA at 1 m from the fan intake. 5. Typical rated speed is measured as RPM±900 at rated voltage.
- 6. Typical rated speed is measured as RPM±600 at rated voltage.
- 7. Typical rated speed is measured as RPM±10% at rated voltage.
- 8. All specifications are measured at 25°C, 65% relative humidity unless otherwise specified.

### PART NUMBER KEY

CBM - 4010B - 140 - 178 - XX - CXX

Base Number

Fan Signals "blank" = no signals 20 = tachometer signal

22 = tachometer signal / PWM control signal

### **APPLICATION NOTES**

#### **Locked Rotor Protection/Auto Restart**

At rated voltage, the current will be reduced or shut down to protect the motor from damage in 72 hours of locked rotor condition. When the fan motor is locked by an external force, the device will temporarily turn off electrical power to the motor and restart automatically when the locked rotor condition is released.

#### **Polarity Protection**

Able to withstand 10 minutes of reverse polarity connection between the positive and negative wires without causing damage.

#### Tachometer Signal (Yellow Wire)

The tachometer signal is for detecting the rotational speed of the fan motor. The output will be a square wave when fan is operating and VFG or VCE depending on the locked rotor position when fan motor is locked (See Figures 1~2 below).

Figure 1: Tachometer Output Circuit

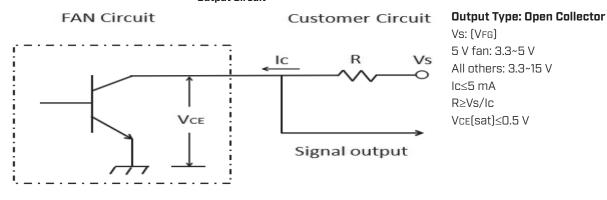

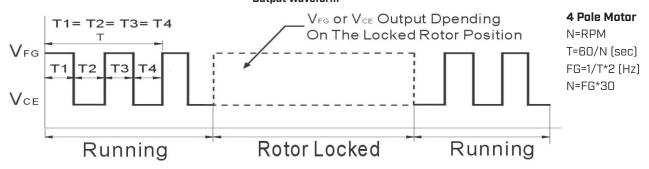

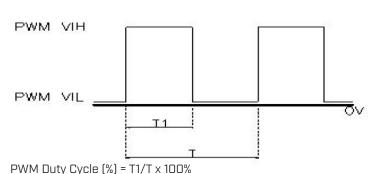

Figure 2: Tachometer Output Waveform

### PWM Signal (Blue Wire)

This wire is for speed control of the fan motor using a PWM input signal from the customer circuit (See Figure 3 below).

Figure 3: PWM Input Signal

| Model                | PWM Frequency<br>Range (kHz) | PWM VIH<br>(V) | PWM VIL<br>(V) |
|----------------------|------------------------------|----------------|----------------|
